Azco Mining Resumes Trading on Over-the-Counter Bulletin Board

GLENDALE, Ariz. -- March 22, 2007 -- Azco Mining Inc. (OTC Bulletin Board: AZMN), a U.S.-based mining and exploration enterprise focused on gold, silver, copper and industrial minerals, has resumed trading on the Over-the-Counter Bulletin Board (OTCBB).

In November 2006, Azco Mining began trading on the Pink Sheets after a delay in financial reporting due to extra time required to complete an audit of the 2004 and 2005 financial statements of the Lordsburg Mining Company, which Azco Mining purchased in May 2006 in order to acquire the Summit silver-gold deposit located in Grant County, N.M. Last month, Azco filed a 10KSB and two 10QSBs, bringing the company current in its financial reporting.

Azco Mining CEO Dr. Pierce Carson said, "Our return to the OTCBB corresponds with the near completion of feasibility work on the company's Summit silver-gold project. We are poised to begin planning a schedule for project development after we receive an estimate of capital and operating costs from an independent engineering study. At today's metal prices, in-ground values at Summit are believed to exceed \$250 million. Our top priority is to begin mining at Summit.

"The money we generate at Summit will be used to fund engineering and resource work on our Ortiz gold project and to pursue other precious and base metal opportunities for acquisition. With the filing issue now behind us, we are focused on maximizing value from our precious and industrial minerals projects for the benefit of shareholders."

About Azco Mining Inc.

Azco Mining is a U.S.-based mining and exploration company focused on acquiring and developing gold, silver, copper and industrial mineral properties. The company owns the Summit silver-gold property and a mill site and processing equipment in southwestern New Mexico; mineral lease rights to the Ortiz gold property in north-central New Mexico, believed to contain 2 million ounces of gold; the Black Canyon mica mine and processing facility near Phoenix, Ariz.; and a large resource of micaceous iron oxide (MIO) in western Arizona. Azco Mining intends to build a portfolio of high-quality,

diversified mineral assets with an emphasis on precious metals. To learn more about Azco Mining Inc., visit <http://www.azco.com>.
